
What are your favorite Xbox 360 Games?

Posted by Commander - 2008/07/31 01:25

Just wondering what you think is the best Xbox 360 game out there and why?

Don't have an Xbox 360, but Burnout Revenge is superb on the Xbox, so I'd be putting my money on Burnout.

Yeah I like Burnout Revenge as well. I have a couple of 360 boxes (one died on me already) and have a few car games. I also have Forza 2 motorsport, Need for Speed most wanted and I think my favorite is Flatout! which is quite similar to the Burnout series except a little more realistic and challenging...plus I love the demolition derby side of the game! Lots of fun!

Haven't seen flatout, but if its better than burnout then omg. I don't have any consoles anymore though, I stick with PC Gaming. At the moment I'm thriving on Warsaw...great and free fps.

Yeah if you like Burnout I am sure you would like Flatout!

Cool, I had not heard of Warsaw but just checked out their site here <http://www.warsow.net/>. It looks like an interesting game. I wish I had more time to explore such sites :)

Yeah, Warsaw is really doing it for me now. The more I play, the better I'm getting (was accused of using an aimbot in Warsaw Instagib today hahaha). I had to laugh at that one (especially since my hit ratio was only 27%). Anyway, Warsaw is great - the movement is awesome, the gameplay is awesome, and its a free game. Can't ask for better than that. It reminds me of what you'd get if you crossed Quake with UT. Which, it sort of is, since its on the Quake Engine and its got fast UT like movement with wall jumps and the like. UT2004 I mean, not UT3 (which is a dismal failure compared to uT2004 for movement). In fact, what's the deal with UT3? I looked into buying it and noticed all the servers were constantly empty....I think Epic screwed up when they dumbed down the movement.
